PFEIFER

PFEIFER Seil- und Hebetechnik

Market portfolio

PFEIFER Group

From wire ropes for cranes and elevators to attachment devices and from lifting equipment to transport and connection systems for precast concrete construction:

We create connections you can count on!

Experienced

We guide through broad expertise and know-how.

Reliable

We execute responsibly.

Solution-Driven

We set standards and develop market-leading solutions.

This is our daily motivation and the reason we exist. For PFEIFER building connections always has two dimensions: Firstly, to develop reliable solutions. On the other, by building trusting relationships with our employees, customers and business partners.

High quality awareness through the worldwide quality management matrix certification according to ISO 9001:2015

Commitment to responsibility in the area of sustainability through external scoring "ECOVADIS" bronze status for PFEIFER Mülheim.

ISO 9001 Certified Quality Management System www.tuv-sud.com/ms-cert

ISO 14001 Certified Environmental Management System www.tuv-sud.com/ms-cert

OHSAS 18001 Certified Occupational Health and Safety Management System www.tuvsud.com/ms-cert

ISO 45001 Certified Occupational Health and Safety Management System www.tuvsud.com/ms-cert

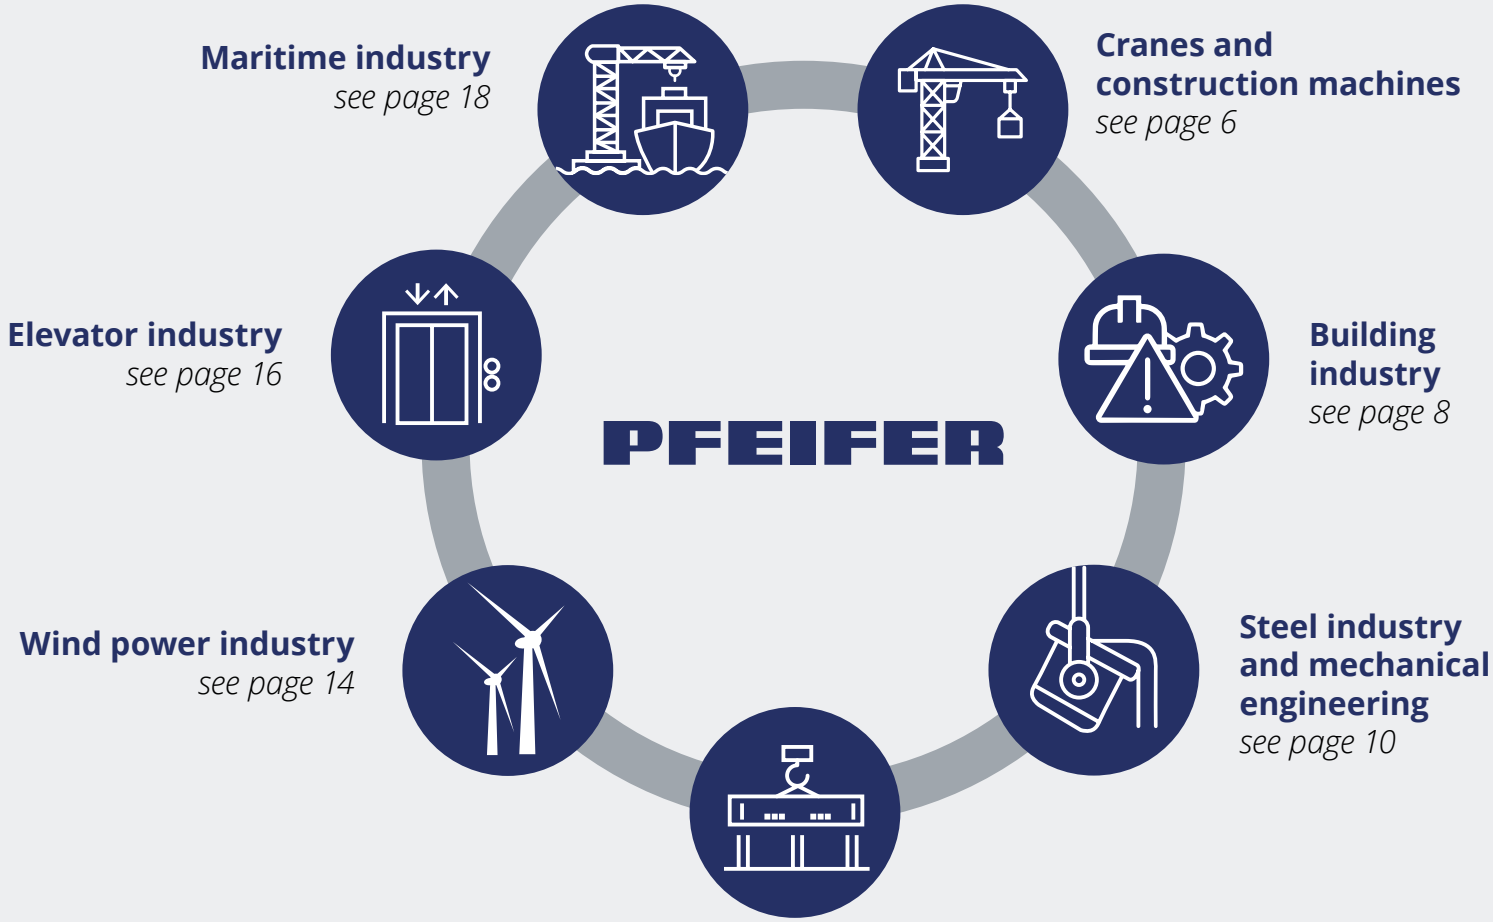
Profile

From its beginnings as a small family-run ropery with hemp ropes, PFEIFER has developed into an international industrial enterprise that continually supplies innovative solutions in the field of rope technology and numerous additional products for the efficient movement, securing and connection of loads.

- **Certified production in 3 countries**
- **Branches in over 15 countries**
- **Around 1,500 employees worldwide**
- **Turnover of 380 million euros**

Various markets – one expert: PFEIFER

With many years of know-how, we set new benchmarks for products and services for a wide range of applications in the following markets:



© 2024 Copyright PFEIFER, 87700 Memmingen / Technical modifications and errors excepted. Status 07/2025

Expertise networked across all markets and products

Our experts in the various market and product units work closely together in a network. This not only saves our customers time and resources in finding the right products and solutions, but also enables the seamless integration of the various products and solutions into their individual processes. As a full-range supplier, we supply you with high quality products from A to Z from a single source, as well as providing the comprehensive services of the PFEIFER Academy and the Mobile Services – worldwide.

Our products for installation, production equipment, transport and assembly

Ropes and rope accessories

- Industrial ropes
- Elevator ropes
- Rope end terminations
- Rope accessories

Precast concrete inserts

- Lifting anchor systems
- Fixing systems
- Assembly anchors
- Connection systems
- Bearings
- Façade technology
- Reinforcement systems
- Slim floor constructions

Load lifting attachments and turnover devices

- Packet handling equipment
- Coil grabs and coil hooks
- Turnover devices
- Pulley blocks
- Spreader beams
- Lifting clamps
- Grippers
- Drum handling equipment

Lifting devices and winches

- Hoists
- Load lifting magnets
- Winches and rope hoists
- Scales
- Transport devices
- Tool hydraulics

Attachment devices and attachment points

- Attachment points and shackles
- Chain and wire rope slings
- Textile round slings, lifting straps and chains
- Edge and abrasion protection systems
- Turnbuckles and DIN chains

Personal Fall protection equipment

- Safety harnesses
- Connecting devices and comprehensive accessories

Cargo lashing equipment

- Lashing chains and lashing straps
- Lashing points and recessed lashing rings
- Anti-slip underlay

Our services

Mobile Services

- Work equipment inspection
- Rope service and rope handling
- Repair, spare part and rental service
- Equipment management and marking

Academy

- Technical seminars for load lifting attachments and attachment devices
- Technical seminars – attachment points for designers
- Technical seminars for lashing equipment
- Technical seminars for crane ropes
- Technical seminars for winches, lifting and pulling devices
- Technical seminar for elevating work platforms
- Technical seminar for crane systems
- Technical seminars for precast construction
- Technical seminars for personal protective equipment to prevent falling

Reliable solutions for

Cranes and construction machines

PFEIFER supplies the optimal rope equipment for your crane applications on the basis of professional application consulting and a wide product range. Through the daily exchange with our customers and partners, we always supply state-of-the-art rope solutions.

As a supplier of ready-to-use, twist-resistant and non-twist-resistant ropes of all performance classes for cranes and construction machines, we are also original equipment suppliers to leading manufacturers of cranes and construction machines.

Application areas of our products

- Mobile and crawler cranes
- Tower cranes
- Special underground construction equipment

Products

- Ready-made special and standard ropes as original equipment or replacement ropes
- Rope end terminations
- Attachment devices and attachment points
- Hoists and winches
- Cargo lashing equipment
- Load lifting attachments and turnover devices
- Fall protection equipment

Services

- PFEIFER Academy – technical seminars for crane ropes
- Mobile Services – swaged sleeve potting and repair
- Rope inspection and analysis
- Rope application advice

Efficient solutions in the

Building industry

PFEIFER supplies customers in the building industry – especially in building, underground, timber and steel construction – with a wide range of products, services and solutions for the efficient lifting, movement and securing of loads in the factory, on the road and on the building site.

Our range encompasses products that are specially designed for installation and production equipment as well as transport and assembly on building sites.

We accompany you through complex challenges in the entire lifting and transport process and support you in making it as efficient and safe as possible.

Contact

construction@pfeifer.de

Application areas of our products

- Lifting and movement of loads in the entire construction process (e. g. precast concrete elements)
- Securing of loads on trucks, drop-side vans and low-loaders
- Fall protection when working in areas with a risk of falling, such as on roofs, scaffolding or working platforms
- Fixing systems for cast in-situ concrete

Products

- Attachment devices and attachment points
- Load lifting attachments and turnover devices
- Hoists and winches
- Cargo lashing equipment
- Ready-made replacement ropes for mobile and tower cranes as well as overhead and gantry cranes
- Anchors and bolts for cast-in-situ concrete applications
- Fall protection equipment

Services

- PFEIFER Academy – technical seminar for experts and users in the area of load lifting attachments, attachment devices, securing of loads, ropes and much more
- Mobile Services – work equipment testing on site and in our service centers

Strong solutions in the

Steel industry and mechanical engineering

For the metal industry and metal trade, as well as mechanical engineering and plant construction, PFEIFER offers tailor-made products and services for the lifting, movement and securing of loads, as well as know-how gained from many years of experience in design and application. Our portfolio ranges from specially designed load lifting attachments for machine transport to winch ropes for overhead cranes.

Application areas of our products

- Load handling in the production and transport of raw materials, semi-finished products and machines (e.g. coil handling)
- Securing of loads on trucks, drop-side vans and low-loaders
- Fall protection for work in areas with a risk of falling on machines, overhead cranes or working platforms

Products for installation, production equipment, transport and assembly

- Attachment devices and attachment points
- Hoists and winches
- Cargo lashing equipment
- Load lifting attachments and turnover devices
- Crane ropes and rope accessories
- Fall protection equipment

Services

- PFEIFER Academy – technical seminar for experts and users in the area of load lifting attachments, attachment devices, securing of loads, ropes and much more
- Mobile Services – work equipment testing on site and in our service centers

Innovative solutions in

Precast construction

PFEIFER offers standard and sophisticated special solutions worldwide for the efficient, safe and cost-effective movement and connection of precast concrete elements.

As a reliable partner, we accompany you in every phase of the project, from planning and design to in-plant handling, delivery and maintenance. Thanks to our in-depth process knowledge in the field of precast concrete element production, we provide you with the optimal solution for your lifting and transport processes.

ftw@pfeifer.de

Application areas of our products

Transport, fastening, reinforcement, assembly and connection of precast concrete elements, such as:

- FT/L sandwich walls
- Columns
- Slabs/TT slabs/plates
- Stairs
- Girder
- Foundations
- Balconies
- Modules
- Slim floor constructions

Products

- Lifting and assembly anchor systems
- Connection, reinforcement and fixing systems
- Bearings
- Facade technology
- Slim floor constructions
- Attachment devices and attachment points
- Hoists and winches
- Cargo lashing equipment
- Load lifting attachments and turnover devices
- Crane ropes and rope accessories
- Fall protection equipment

Services

- PFEIFER Academy – technical seminars for experts and users in the area of lifting anchor systems
- Mobile Services – work equipment testing on site and in our service centers
- Application advice
- Dimensioning software

Individual solutions in the

Wind power industry

As a worldwide system supplier to OEMs in the wind power industry and their suppliers, PFEIFER develops comprehensive customer-specific technical solutions for the erection, maintenance and production of the towers, nacelles and rotor blades of wind turbines.

The portfolio ranges from process-optimised lifting technology, spreader beams and transport frames to turnover devices and individual tools for lifting and securing. "Off the shelf" lifting and lashing equipment is procured locally and worldwide and delivered on time. Stationary and mobile testing services are performed by specially trained technicians and guarantee the certified availability of the lifting equipment. Seminars for individual customers optimise the correct and safe use of the tools by the user on site.

Application areas of our products

- Wind turbine construction (OEM)
- Erection and servicing of wind farms
- Production of components:
  Towers, rotor blades, etc.

Products

- Winch ropes
- Lifting and turning technology
- Attachment and lashing equipment
- Lifting and transport equipment
- Fall protection equipment

Services

- PFEIFER Academy – product training for attachment devices, hoists, personal protective equipment and much more
- Mobile Services – work equipment testing on site and in our service centers

Certified solutions in the

Elevator industry

DRAKO special ropes from PFEIFER are used for the highest, fastest and most demanding elevator systems worldwide. The lifts in the Eiffel Tower, the Shanghai World Financial Centre and the Burj Khalifa are just a few examples of the execution of application-specific rope design in co-operation with our customers.

In addition, PFEIFER plays a leading role in the development of innovative drive concepts for the national and international elevator industry, especially for elevators without a machine room for low-rise buildings. Specially designed for space-saving and highly efficient elevators without a machine room, DRAKO ropes have proven themselves successfully for years.

Contact

elevator@pfeifer.de

Application areas of our products

- Passenger elevators
  - High-rise
  - Mid-rise
  - Low-rise
- Special elevators
  - Load elevators
  - Inclined elevators

Products

- Suspension ropes
- Governor ropes
- Rope end terminations
- Counterweight systems
- Rope re-lubrication device
- Special lubricant

Services

- Rope seminars level A, B, C
- Roping Service (PDL UK)
- OEM-specific logistics solutions
  - New Installation
  - Existing Installation
- DRAKO Rope Calculator
- Internal and external rope tests and approvals
- Research and Development

Resistant solutions for the

Maritime industry

PFEIFER offers a wide range of products and services for the maritime industry. Thanks to the close exchange of information with manufacturers and operators, we know the high requirements exactly. When manufacturing and assembling high-quality ropes for container terminal equipment and harbour cranes, we therefore attach great importance to ensuring that our products meet these requirements 100 % in practice.

Application areas of our products

- Container terminal equipment
- Shipboard cranes
- Mobile harbour cranes/gripper operation
- Lifeboat davits

Products

- Ropes for harbour cranes and systems
- Special spreader beams
- Attachment and lashing equipment
- and much more

Service

- PFEIFER Academy – technical seminars for crane ropes
- Rigging service
